## Key Audit Matters

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

This matter was addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Recoverable value of goodwill (\$233.2 million)	
Refer to Note 2.6 to the Financial Report	
The key audit matter	How the matter was addressed in our audit
<p>At 30 June 2022 the Group's balance sheet includes goodwill contained within three cash generating units (CGUs) – Australia, International and Ultrasound.</p> <p>A key audit matter for us was the Group's annual testing of goodwill for impairment, given the size of the balance (being 61% of total assets) and the extent of judgement involved. We focused on the significant forward-looking assumptions the Group applied in its value in use models, including:</p> <ul style="list-style-type: none"> <li>• Forecast cash flows, growth rates and terminal growth rates in light of market conditions impacting each CGU and continued economic uncertainties during and post the COVID-19 pandemic. These conditions impact our consideration of forecasting risk; and</li> <li>• Discount rates, which vary according to the conditions and environment the specific CGU is subject to from time to time.</li> </ul> <p>The models are largely manually developed, use adjusted historical performance and a range of internal and external sources as inputs to the assumptions. Modelling using forward-looking assumptions tends to be prone to greater risk for potential bias, error and inconsistent application. Where the Group has not met prior year forecasts in relation to a specific CGU we factor this into our assessment of forecast assumptions. These conditions necessitate additional scrutiny by us, in particular to address the objectivity of sources used for assumptions, and their consistent application.</p> <p>We involved valuation specialists to supplement our senior audit team members in assessing this key audit matter.</p>	<p>Our procedures included:</p> <ul style="list-style-type: none"> <li>• We considered the appropriateness of the Group's value in use methodology to perform the annual test of goodwill for impairment against the requirements of the accounting standards.</li> <li>• We assessed the integrity of the value in use models used, including the accuracy of the underlying calculation formulas.</li> <li>• We compared the forecast cash flows contained in the value in use models to Board approved forecasts.</li> <li>• We assessed the accuracy of previous Group forecasts to inform our evaluation of forecasts included in the models.</li> <li>• We assessed the Group's underlying methodology and documentation for the allocation of corporate costs and corporate assets to each CGU, for consistency with our understanding of the business and the criteria in the accounting standards.</li> <li>• We considered the sensitivity of the models by varying key assumptions, such as forecast cash flows, growth rates and discount rates, within a reasonably possible range. We did this to identify those assumptions at higher risk of bias or inconsistency in application and to identify those CGUs at higher risk of impairment and to focus our further procedures.</li> <li>• We challenged the Group's forecast cash flow and growth assumptions in light of the expected continuation of uncertainties arising from the COVID-19 pandemic, with a particular focus on the Ultrasound CGU. We used our knowledge of the Group, business and patients and our industry experience.</li> </ul>

	<ul style="list-style-type: none"> <li>• Working with our valuation specialists, we:             <ul style="list-style-type: none"> <li>- independently developed a comparable discount rate range from publicly available market data for comparable entities and adjusted by specific risk factors to the Group and the industry it operates in;</li> <li>- independently assessed the growth rates based on the industry in which the Group operates and current economic environment; and</li> <li>- compared the implied multiples for comparable entities to the implied multiples from the Group's value in use models.</li> </ul> </li> <li>• We assessed the disclosures in the financial report using our understanding obtained from our testing and against the requirements of the accounting standards.</li> </ul>

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
